

The background of the entire page is a photograph of a modern, two-story house. The house has white walls and horizontal wooden cladding on the upper floor. A dark grey, multi-paneled garage door is visible on the left. The house has a dark grey roof and a paved driveway. The sky is blue with some light clouds.

GARADOR
The Garage Door People

The Garador Range Price List

January 2026

General Information

All prices are quoted in £ Sterling, ex-works and exclusive of VAT.

Our doors are for residential purposes only and not for commercial use.

Please ensure that you order the correct size door to fit your opening as we are unable to accept the return of incorrectly ordered goods. Please contact Garador on 01935 443722 if you need assistance in calculating the correct size. A comprehensive range of the less common accessories and all spare parts are available either online or ask for a current spares price list if required.

Since the company's policy is one of continuous improvement of its products, we reserve the right to make any alterations in design, manufacture or price.

All business is governed by the Company's Standard Conditions and this document does not form any part of any contract with the company and statements contained in it should not be construed as representations or warranties.

¹ No fitting clearance allowed. If door is fitted between the brickwork a minimum of 10 mm clearance over the width and 5 mm over the height should be added to the overall frame size when selecting the door.

Steel Panel Doors

Surface

High quality powder or foil coated finish.

Please note: panel doors are produced with appearance in mind. This may result in some small gaps which could allow water ingress especially in exposed locations.

Colours

All doors supplied in Traffic White (RAL 9016) as standard.

Optional colours available:

- | | | |
|--------------------------|------------------------------|-----------------------------|
| • Light Ivory (RAL 1015) | • Moss Green (RAL 6005) | • Jet Black (RAL 9005) |
| • Ruby Red (RAL 3003) | • Fir Green (RAL 6009) | • Window Grey (RAL 7040) |
| • Signal Blue (RAL 5005) | • Slate Grey (RAL 7015) | • Burgundy Brown |
| • Steel Blue (RAL 5011) | • Light grey (RAL 7035) | • Golden Brown |
| • Stone Grey (RAL 7030) | • Anthracite Grey (RAL 7016) | • Chartwell Green (BS 4800) |
| • Pigeon Blue (RAL 5014) | • Terra Brown (RAL 8028) | • Agate Grey (RAL 7038) |

Timber effect finishes are available in either a Golden Oak or Rosewood foil coat timber effect.

Handle

Black handle as standard, optional handles are available. Doors can be supplied undrilled and without handle and locking mechanism for use with electric operator. This option makes the door purpose made and will therefore increase lead-time, please specify clearly on order (Wentwood and Sherwood designs are not available with no lock hole).

Terminology

Nominal Door Size: This is the actual door panel size plus the fitting tolerances. The nominal door size should be used for internal dimensions of a timber frame.

Size Code: This has traditionally been used to order doors. This may not be the actual door size.

Stock availability

Prices in bold show stock doors in Traffic White (unless specified) and all other prices relate to non-stock doors.

Packaging

All doors are supplied unwrapped as standard, with optional poly-wrapping available.

Steel Panel Doors

Canopy gearing (shown as C)

Canopy gear is available for all single doors providing a reliable and affordable gearing solution, with no tracks running back into the garage.

Retractable gearing (shown as R)

Retractable gear is available for all single and double doors providing a reliable and affordable gearing solution, with tracks running back into the garage.

Please note that doors with windows may have cross bracing or locking rods passing behind the windows depending upon size and gear type.

Guardian Range

Secured By Design certified Up & Over doors

These doors have been tested to the STS 202 Security Technical Specification and achieve Secured By Design accreditation. Lock body protection, anti-snap cylinder, high security bracing and improved lock security make these doors even more secure.

Information

- Guardian Range doors come with a pre-fitted steel frame and cannot be fitted to a custom made timber frame.
- Guardian Range doors are not suitable for automation. Only available with canopy or retractable lifting gear.
- Retractable plus not available.
- Window panes on Secured by Design Salisbury doors are black non-translucent.

Design Range

Surface and finish

The Series 100 Design Range skins are built from four horizontal skins, whilst the Series 200 range is constructed from three vertical skins. Stainless steel elements on Garador design range doors are manufactured from high grade 2 mm thick steel with a brushed finish. The series 100 and 200 design range doors are also available without stainless steel elements. On Design Range doors a choice of any standard colour comes free of charge, please see page 23 for a choice of the 19 standard RAL colours available.

Please note: panel doors are produced with appearance in mind. This may result in some small gaps which could allow water ingress especially in exposed locations.

Handle

A new perfectly matched handle offers a quality feel everytime you open the door.

Terminology

Nominal Door Size: This is the actual door panel size plus the fitting tolerances. The nominal door size should be used for internal dimensions of a timber frame.

Size Code: This has traditionally been used to order doors. This may not be the actual door size.

GRP Premier Panel Doors

Surface

High gloss or woodgrain finish depending on door style.

GRP Premier doors are constructed as an infill panel and are fixed into a rigid box section chassis.

The infill has a flow coat to the inside face for a smoother finish and reduced translucency.

Please note: panel doors are produced with appearance in mind. This may result in some small gaps which could allow water ingress especially in exposed locations

Standard colours

Arden and Stamford are available in Gloss White and Gloss Magnolia finish only. All other doors are available in the following range of woodgrain colours: White, Magnolia, Bleached Oak, Red Mahogany, Dark Mahogany, Light Oak, Dark Oak, Irish Oak, Honey Beech, Teak, Golden Brown, Ebony and Anthracite Grey.

Due to the production processes door colours may vary. Should you require matching doors please specify on your order.

Please note when trying to colour match garage doors with other UPVC products always check a colour sample first. The gel coats used in the process will not necessarily be a match and we will not guarantee a match with any other product.

Premium colours

Our GRP premium colour range includes Blue and Green. There is an additional surcharge for these colours, see page 26 for details.

Chassis colour

Traffic White (RAL 9016) for White Woodgrain and Gloss White doors, Black (RAL 9005) for Ebony coloured doors, Anthracite Grey (RAL 7016) for Anthracite Grey doors, Light Ivory (RAL 1015) for Magnolia Gloss and Magnolia doors, Fir Green (RAL 6009) for Green doors and Steel Blue (RAL 5011) for Blue doors.

Burgundy Brown will be used as the chassis colour for Red Mahogany, Dark Oak and Dark Mahogany. All other doors will be supplied with a Terra Brown (RAL 8028) chassis.

Handle

Black handle and base plate as standard, optional handles available. Doors can be supplied undrilled and without handle and locking mechanism for use with electric operator. This must be requested at the time of order.

Certain panel configurations may only be available without handle or locking, therefore only suitable for electric operation (consult Garador sales office for exact details).

GRP Premier Panel Doors

Terminology

Nominal Door Size: This is the actual door panel size plus the fitting tolerances. The nominal door size should be used for internal dimensions of a timber frame.

Size Code: This has traditionally been used to order doors. This may not be the actual door size.

Packaging

Supplied with front surface protection as standard.

Canopy gearing (shown as C)

Canopy gear is available for all single doors providing a reliable and affordable gearing solution, with no tracks running back into the garage.

Retractable gearing (shown as R)

Retractable gear is available for all single and double doors providing a reliable and affordable gearing solution, with tracks running back into the garage.

Timber Panel Doors

Surface

Timber doors are supplied untreated and require immediate on-site finishing unless fully finished option specified. Timber is a natural material and therefore Garador cannot guarantee to be able to produce matching timber garage doors. Chassis colours will be Brown (RAL 8028) on all timber doors

Please note: panel doors are produced with appearance in mind. This may result in some small gaps which could allow water ingress especially in exposed locations.

Handle

Black handle and base plate supplied as standard, optional handles available. Doors can alternatively be supplied undrilled and without handle and locking mechanism for use with electric operator.

Packaging

Supplied wrapped with additional foam protection on surface of panel as standard.

Terminology

Nominal Door Size: This is the actual door panel size plus the fitting tolerances. The nominal door size should be used for internal dimensions of a timber frame.

Size Code: This has traditionally been used to order doors. This may not be the actual door size.

Canopy gearing (shown as C)

Canopy gear is available for all single doors providing a reliable and affordable gearing solution, with no tracks running back into the garage.

Retractable gearing (shown as R)

Retractable gear is available for all single and double doors providing a reliable and affordable gearing solution, with tracks running back into the garage.

Steel and Timber Side-hinged Doors

Surface

Steel Side-hinged doors are constructed around a strong steel box section chassis in Traffic White (RAL 9016) as standard. Timber doors constructed using timber, built around our steel box section chassis. A range of stain options are available.

Pre-Framed Design and Concealed Hinges

All doors come factory pre-framed with 75mm wide door frame and right-hand door leaf leading as standard. Hinges are concealed in the frame, with no hinge knuckles protruding above the surface of the door.

Two-Point Locking

A shoot bolt latch is used to secure the fixed door leaf at the top and bottom.

Door Stays and Gas Piston

Supplied complete with solid metal door stays and pull cord release. Gas pistons are fitted to each door leaf for a controlled closing motion.

Rubber weather seals

Sturdy rubber weather seals all built into the door frame and along the door stop on the fixed and leading door leaf.

Aluminium threshold

A 20 mm aluminium threshold is supplied as standard at the base of the door.

Steel Colours

Standard colours are:

- Traffic White (RAL 9016)

Optional colours available:

- | | | |
|--------------------------|------------------------------|-----------------------------|
| • Light Ivory (RAL 1015) | • Fir Green (RAL 6009) | • Window Grey (RAL 7040) |
| • Ruby Red (RAL 3003) | • Slate Grey (RAL 7015) | • Terra Brown (RAL 8028) |
| • Signal Blue (RAL 5005) | • Anthracite Grey (RAL 7016) | • Jet Black (RAL 9005) |
| • Steel Blue (RAL 5011) | • Stone Grey (RAL 7030) | • Bergundy Brown |
| • Pigeon Blue (RAL 5014) | • Light grey (RAL 7035) | • Golden Brown |
| • Moss Green (RAL 6005) | • Agate Grey (RAL 7038) | • Chartwell Green (BS 4800) |

Timber Stains

Full finished stains available as an option. Stain colours include Light Oak, Antique Oak, Mahogany, Walnut, Chestnut and Ebony

Steel and Timber Side-hinged Doors

Handle

Supplied with black lever/ lever handle on right side (viewed outside) and centrally located flip-up handle which releases shoot-bolt latches at the top and bottom of the fixed leaf (viewed inside).

Terminology

Nominal Door Size: This is the actual door panel size plus the fitting tolerances. The nominal door size should be used for internal dimensions of a timber frame..

Size Code: This has traditionally been used to order doors. This may not be the actual door size.

Packaging

All doors are supplied wrapped. Only steel doors are supplied unwrapped as standard with optional poly-wrapping available.

Garage Side Doors & Side-hinged Doors – Specifications

Door leaves supplied factory pre-framed ready for site installation. Fixed leaf (RH side when viewed from inside) fitted with tower bolts at top and bottom of inner leading edge. The floor will need to be finished and level for the bottom tower bolts to engage. These doors are designed for in-between fixing.

Garage Side door factory pre-framed

Between brickwork fixing

Door specification

The nominal clear passage clearance is 74 mm less than the opening width and 125 mm less than the opening height. **Not recommended** for behind brickwork fixing.

Side-hinged door factory pre-framed

Between brickwork fixing

Door specification

The nominal drive through clearance is 30 mm less than the opening width and 125 mm less than the opening height. **Not recommended** for behind brickwork fixing.

Side-Hinged Garage Door Steel Frame Specifications

	Width	Height	Depth
Side-Hinged Doors	75 mm	60 mm	75 mm

Steel Panel Doors – Specifications

Canopy Gear Specifications

The canopy gear allows the door to travel in vertical tracks and is counterbalanced by an overhead torsion spring. The nominal drive through is 40 mm less than the opening width and 130 mm less than the opening height.

In the open position, the door projects approximately one third of the door height, forming a canopy.

For doors fitted with an operator, please observe operator specifications.

On-site timber frame

Retractable steel frame (single door)	75 mm	40 mm
Retractable steel frame (double door)	75 mm	80 mm

Steel Panel Doors – Specifications

Single & Double Retractable Gear Specifications

The retractable gear allows the door to be retracted inside the garage when open by means of horizontal overhead tracks supported by wall or ceiling mounted suspension brackets. This gear is available as an option for single doors and comes as standard with double garage doors.

The nominal drive through clearance is 105 mm less than the opening width and 110 mm less than the opening height for single doors and 140 mm less than the opening height for double doors.

For doors fitted with an operator, please observe operator specifications.

* Only applies to single doors up to 1070.

Steel Sectional Garage Doors

Door sections

Made of galvanised steel. Premium doors have a 42 mm thick insulated door section that is filled with PU-foam (100 % CFC-free). Bottom door section comes with floor seal.

Surface

Outside: Duragrain, Woodgrain embossed, Slategrain or Silkgrain textures with painted or foil coated finishes.

Inside: Pebble texture.

Spring arrangement

All doors up to 4000 mm wide (excluding Silkgrain) come with tension springs as standard and torsion springs are available at extra cost. All doors over 4000 mm wide (excluding Silkgrain) come with torsion springs as standard. Low headroom application available at extra cost. Doors with a Silkgrain surface finish are supplied with tension springs as standard up to 3049 mm wide and torsion springs as standard on doors over 3050 mm wide.

Side frames & Fascia

Sectional doors are designed to be fitted behind the reveals and side frames are supplied white in colour. Cover profiles are available for use with coloured or foil coated door finishes. A single skin fascia is supplied with all doors which is finished in the same colour as the door sections. For Slategrain models, the door section has a Slategrain texture but the cover profiles and fascia are smooth.

Colours

Steel Woodgrain and Silkgrain doors can be ordered in almost any colour from the RAL colour chart. Slategrain is only available in standard RAL colours and Traffic White (RAL 9016).

Standard colours available (Silk Gloss):

- | | | |
|--------------------------|------------------------------|------------------------------|
| • Light Ivory (RAL 1015) | • Anthracite Grey (RAL 7016) | • Quartz Grey (RAL 7039) |
| • Moss Green (RAL 6005) | • Titan Metallic (CH 703) | • Window Grey (RAL 7040) |
| • Fir Green (RAL 6009) | • Stone Grey (RAL 7030) | • Terra Brown (RAL 8028) |
| • Basalt Grey (RAL 7012) | • Light grey (RAL 7035) | • Jet Black (RAL 9005) |
| • Slate Grey (RAL 7015) | • Agate Grey (RAL 7038) | • Chartwell Green (BS 14C35) |

Standard colours available (Silk Matt):

- White Aluminum (Silk Matt) (RAL 9006)
- Grey Aluminium (Silk Matt) (RAL 9007)

Steel Sectional Garage Doors

Timber effect foil coated doors are available in the following five finishes:

Golden Oak, Dark Oak, Night Oak, Rosewood and Winchester Oak. Only Golden Oak and Rosewood surface finishes are kept as stock door sizes (prices highlighted in bold) for timber effect sectional garage doors. Dark Oak, Night Oak and Winchester Oak surface finishes are not stocked, but are made to order. Foil coated finish also available in Titan Metallic (CH 703)

Duragrain standard colour finishes are:

Standard colours are:

- Concrete
- Grigio Scuro
- Cherry
- Noce Sorrento Balsamico
- Teak
- White Brushed
- Beige
- Nature Oak
- Rusty Steel
- Noce Sorrento Nature
- Used look

- Bamboo
- Pine
- Sapele
- Terra Walnut
- White Oiled Oak
- Grigio
- Burned Oak
- Rusty Oak
- Sheffield
- Colonial Walnut
- White Washed Oak
- Burned Oak
- Spruce
- Malt Oak

Vertical Duragrain Standard Colours:

- Burned Oak
- Spruce
- Malt Oak
- Sheffield
- Whiteoiled Oak
- Whitewashed Oak

Handle

Sectional doors in shaded boxes are generally supplied ex-works for automatic operation, i.e. without handle hole and lock. Factory-fitted handle and lock are available with an increased lead-time. All other doors are on a 4 to 6 week lead-time. For electrical operation of a garage with no other personal access, an emergency release kit must be fitted

Packaging

Sectional doors are provided in a palletted format shrink wrapped for easy handling.

Stock availability

Popular sectional doors are generally ex-stock in Traffic White (RAL 9016) and Terra Brown (RAL 8028) in some sizes, other sizes and colour options require up to 6 weeks lead-time. Contact sales office for further details.

Minimum ceiling height:	115 mm
Minimum ceiling height (with ThermoFrame):	145 mm

Side view

Plan view

Ultra Steel Sectional Garage Doors

Door sections

Made of galvanized steel. Only available as Premium (67 mm thick insulated panel) version. Premium doors are PU-foam insulated (100% CFC-free). Bottom door section comes with floor seal.

Thermal insulation

Door sections have a thermal insulation value of $U = 0.33 \text{ W/(m}^2\text{K)}$.

The fitted door (without ThermoFrame) has a thermal insulation value of $U = 1.00 \text{ W/(m}^2\text{K)}$.

The fitted door (with ThermoFrame) has a thermal insulation value of $U = 0.88 \text{ W/(m}^2\text{K)}$.

Fitting Thermoframe can add up to 15% on the U Value.

Design and surface

Ultra steel sectional garage doors are available in Linear Medium and Linear Large designs only.

Outside: Decograin, Silkgrain with painted colour finish. Inside: pebble texture in Grey White (RAL 9002).

Spring arrangement

- All doors up to 3000 mm wide come with tension springs as standard and torsion springs are available at extra cost.
- All doors over 3001 mm wide come with torsion springs as standard. Low headroom application available at extra cost.
- Tracks, lifting gear and fittings are supplied galvanised as standard. For the painted version, they are in Grey White (RAL 9002).

Side frames & fascia

Sectional doors are designed to be fitted behind the reveals and side frames are supplied white in colour.

Cover profiles are available for use with coloured or foil coated door finishes. A single skin fascia is supplied with all doors which is finished in the same colour as the door sections.

Colours

Steel Silkgrain doors can be ordered in the following RAL colours.

Standard colours available (Silk Gloss):

- | | | |
|--------------------------|------------------------------|------------------------------|
| • Light Ivory (RAL 1015) | • Anthracite Grey (RAL 7016) | • Quartz Grey (RAL 7039) |
| • Moss Green (RAL 6005) | • Titan Metallic (CH 703) | • Window Grey (RAL 7040) |
| • Fir Green (RAL 6009) | • Stone Grey (RAL 7030) | • Terra Brown (RAL 8028) |
| • Basalt Grey (RAL 7012) | • Light grey (RAL 7035) | • Jet Black (RAL 9005) |
| • Slate Grey (RAL 7015) | • Agate Grey (RAL 7038) | • Chartwell Green (BS 14C35) |

Ultra Steel Sectional Garage Doors

Standard colours available (Silk Matt):

- White Aluminum (Silk Matt) (RAL 9006)
- Grey Aluminium (Silk Matt) (RAL 9007)

Timber effect foil coated doors are available in the following two finishes:

Golden Oak and Dark Oak.

Handle and electric automation

Ultra sectional garage doors cannot be fitted with handles and must therefore be electrically operated. For garages with no other personal access, an emergency release kit must be fitted.

Packaging and stock availability

Sectional doors are provided in a palletted format, shrink wrapped for easy handling, and come with a separate gear pack. All sectional doors are made to order and will require 4-6 weeks for delivery.

¹ Colours available at surcharge (£44 for standard colour, £73 for non-standard colour, £134 for special RAL colour).

² Windows are painted in a colour to best match the foil coat (colour included in the price).

Standard = S0, Cross = S1, Diamond = S2, Linear 1 = Type D, Linear 2 = Type M0, Linear 3 = Type L0.

Ultra Steel Sectional Garage Doors

Ultra sectional doors (Silkgrain) up to 3000 mm wide and / or 2625 mm high:

Ultra sectional doors (Timber Effect) up to 4000 mm wide and / or 2625 mm high:

These doors come with tension spring fitting. With doors from the Premium range the tension springs can be replaced by torsion springs as an option. Tension springs are suitable for low headroom installations. For a low headroom installation with torsion springs please order low headroom track set separately (changing to a low headroom option is not available as a retrofit).

Sectional garage door with tension spring fitting

Minimum garage dimensions for doors with GaraMatic operator

Headroom:	115 mm
Sideroom:	90 mm (each side)
Depth into garage:	garage door height + 510 mm
Clear passage height for doors with GaraMatic operator:	garage door height - 55 mm
Minimum ceiling height:	115 mm
Minimum ceiling height (with ThermoFrame):	145 mm

Ultra Steel Sectional Garage Doors

Ultra sectional doors (Silkgrain) wider than 3000 mm wide and / or 2625 mm high:

Ultra sectional doors (Timber Effect) wider than 4000 mm wide and / or 2625 mm high:

These doors come with torsion springs as standard. For a low headroom installation with torsion springs please order low headroom track pack (changing to a low headroom option is not available as a retrofit).

Sectional garage door with torsion spring fitting

Minimum garage dimensions for doors with GaraMatic operator

Headroom:	210 mm
Sideroom:	90 mm (each side)
Depth into garage:	garage door height + 510 mm
Clear passage height for manually operated doors:	garage door height -

Minimum ceiling height:	210 mm
Minimum ceiling height (with ThermoFrame):	255 mm

For doors under thermal loads, the operator is to be fitted 40 mm higher if applicable.

Ultra Steel Sectional Garage Doors

Ultra sectional doors (Silkgrain) wider than 3000 mm wide and / or 2625 mm high:

Ultra sectional doors (Timber Effect) wider than 4000 mm wide and / or 2625 mm high:

These doors come with torsion springs as standard. For a low headroom installation with torsion springs please order low headroom track pack (changing to a low headroom option is not available as a retrofit).

Sectional garage door with low headroom torsion spring fitting

Minimum garage dimensions for doors with GaraMatic operator

Headroom:	115 mm
Sideroom:	90 mm (each side)
Depth into garage:	for doors up to 2125 mm high: 3200 mm for doors up to 3000 mm high: 4125 mm

Clear passage height for doors with GaraMatic operator:	For doors up to 3000 mm wide: garage door height - 55 mm for doors wider than 3000 mm: garage door height - 105 mm
---	---

Minimum ceiling height:	115 mm
Minimum ceiling height (with ThermoFrame):	145 mm

Side Hinged Garage Doors

Door sections

Garage side doors are constructed from aluminium and steel. They are 42 mm thick and have a PU-foam infill (100% CFC-free).

Surface

Outside: Woodgrain, Slategrain, Duragrain, Silkgrain or Timber Effect textures only available in a foil coated finish.

Inside: Pebble texture (Grey White RAL 9002).

Frames

Only available with block frame (profile type 2) only.

Colours

Steel Woodgrain, Slategrain and Silkgrain doors can be ordered in almost any colour from the RAL colour chart. Slategrain surface texture only available in standard RAL colours and Traffic White (RAL 9016).

Standard colours available (Silk Gloss):

- Light Ivory (RAL 1015)
- Moss Green (RAL 6005)
- Fir Green (RAL 6009)
- Basalt Grey (RAL 7012)
- Slate Grey (RAL 7015)
- Anthracite Grey (RAL 7016)
- Titan Metallic (CH 703)
- Stone Grey (RAL 7030)
- Light grey (RAL 7035)
- Agate Grey (RAL 7038)
- Quartz Grey (RAL 7039)
- Window Grey (RAL 7040)
- Terra Brown (RAL 8028)
- Jet Black (RAL 9005)
- Chartwell Green (BS 14C35)

Standard colours available (Silk Matt):

- White Aluminum (Silk Matt) (RAL 9006)
- Grey Aluminium (Silk Matt) (RAL 9007)

Timber effect foil coated doors are available in the following five finishes:

Golden Oak, Dark Oak, Night Oak, Rosewood and Winchester Oak. Foil coated finish also available in Titan Metallic (CH 703) for Linear Medium and Linear Large doors only. Decopaint colour finish not available.

Side Hinged Garage Doors

Duragrain standard colour finishes are:

Standard colours are:

- Concrete
- Grigio Scuro
- Cherry
- Noce Sorrento Balsamico
- Teak
- White Brushed
- Beige
- Nature Oak
- Rusty Steel
- Noce Sorrento Nature
- Used Look

- Burned Oak
- Rusty Oak
- Sheffield
- Colonial Walnut
- White Washed Oak
- Burned Oak
- Spruce
- Malt Oak

Handle

Sectional side hinged doors are supplied complete with black plastic lever / lever handle as standard.

Premium side hinged

Premium side hinged doors are supplied complete with hinges in a choice of either black, white or aluminium finish at no extra charge.

Handing

For all premium side hinged doors, the door is viewed from the outside looking in.

Installation

Premium side hinged doors are designed for fitting between the opening, opening outwards and inwards.

Packaging

Sectional garage side doors are packed with polystyrene around the door and then shrink wrapped.

Stock availability

Premium side hinged garage doors are made to order and requires approximately 6 weeks lead-time. Contact sales office for further details.

Automation and Accessories

Operators

GaraMatic operators are an ideal match for all current Garador up & over and sectional garage doors. They are a tried and tested hardware combination, designed for use with Garador up & over or sectional garage doors, and prepared for easy installation. They feature energy efficient LED light, a power saving mode and a mechanical lock, built into the operator boom, to prevent forced lifting of the door.

What's included

All GaraMatic operators come as a complete set, including operator head, boom and two 4-button hand transmitters.

BlueSecur App

The Garador BlueSecur app allows you to control your Series 4 GaraMatic operator from your android or ios smartphone. It allows you to operate the open/close, partial opening and integral light functions. Both the GaraMatic 10 and GaraMatic 20 are supplied complete with an integrated bluetooth receiver, for control via Garador's BlueSecur smartphone app for android and ios devices. One free user key is included. Others available via in-app purchase. Please refer to Garador BlueSecur for pricing. The bluetooth receiver can be switched on and off. An optional bluetooth receiver is available as an add-on for the GaraMatic 9.

BS EN 13241 Compliant

The combination of Garador garage doors with GaraMatic operators complies with the latest European safety standards.

GaraRoll Roller Doors

GaraRoll Insulated Roller Doors

Spring-compensated, automated roller garage door for domestic applications only. All doors are made to suit the opening with the actual door size relating to the structural opening width x height and the guides fitting on the reveals to maintain a full opening size. The GaraRoll is the only roller garage door to include the cover hood, which the curtain rolls into at the head of the garage door opening, as standard. The door is also supplied complete with a DuraBelt anti-scratch system, designed to provide a protective layer between each lath as they roll up when the door is open.

Door curtain

77 mm rolled aluminium profile filled with 100 % CFC-free polyurethane rigid foam. Each lath is 15mm thick. Integrated windlocks fitted as standard.

Surface

Colour finish with double layer coil coating quality paint system or foil-coated timber effect finish.

Frame

Aluminium extrusion profile side guides with integrated plastic runners. Lintel and cover box made of steel. Colour of side guides and lintels supplied to match the door as standard. Except on foil-coated and deco paint timber effect doors where they are supplied in a solid brown paint finish. Cover box coated Grey White (RAL 9002).

Counterbalance

Tension spring technology with lateral integral double tension springs and double cables encased within a transparent cover.

Colours

Same colour inside and outside

Deco paint doors available in Anthracite Metallic (Noir 2100 Sable), Golden Oak and Rosewood, with the same finish inside and out.

Foil-coated doors available in Golden Oak and Rosewood, with the inside of the lath in dark brown (foil coat not available on GaraRoll external roller garage door).

GaraRoll Roller Doors

Operator and Control

Garador operator and control included. 24 V DC gear drive, mains voltage 230-240 V AC, 0.5 kW, opening speed approx. 11 cm/s, integrated door security kit, operator always located on left (viewed from inside), plastic housing. Micro-processor control in separate plastic housing, automatic teaching of auto safety cut-out and travel limits, soft start and soft stop, light, impulse control, adjustable automatic timer (hold-open time 30 sec. after activation, additional photocell required). Included: 2 hand transmitters and integral receiver, connecting lead with CEE plug, control buttons in cover of the control unit, integrated 2-minute garage light in control housing, quick release (operated from inside). Please note, a wired optical sensor is included as a mandatory safety feature for all GaraRoll doors over 5000 mm wide.

Windows

Window size approx. 120 x 40 mm, number of windows per door section depends on door width. Windows made of clear synthetic pane with black window frame on exterior, transparent frame on interior. Maximum of 10 window sections per door. Window arrangement:

GaraRoll SBD

Only possible when installed completely behind opening. For clarification – no fascia or guides can show into the opening

- Only available in width range 1900mm – 3000mm
- Only available in heights range 2000mm – 3100mm
- Not available with windows or ventilation grills
- Not available with emergency release

Packaging

GaraRoll doors are supplied in a palletted format shrink wrapped as a complete package.

GaraRoll Roller Doors

Stock availability

All GaraRoll doors are made to order with no standard sizes. Lead-time for all doors is 3 to 4 weeks.

Remember the GaraRoll door is measured as opening size and not as overall guide width.

This not only makes it the same as all other Garador doors for sizing but also will probably reduce the price against other doors as most other door manufacturers calculate the price as over guide width thus making the actual door around 220 mm smaller!

Secured by Design

Secured by Design is an association focusing on the design of more secure homes and commercial properties. Secured by Design is owned by the ACPO (Association of Chief Police Officers) and awards the Secured by Design status to products that pass their extensive testing procedures.

GaraRoll Roller Doors

Minimum product dimension is 1000 mm x 1600 mm.

Only the door prices highlighted are available with the external roller garage door fitting as an option.

GaraGlide Roller Doors

GaraGlide Roller Doors

A motor driven, roller garage door with tubular drive motor, closing edge safety device and manual hand crank for emergencies. The emergency release kit is not available for a retro-fit application so must be ordered with the original door. All doors are built to suit the opening, with the actual door size relating to the structural opening width x height and the guides fitting on the reveals to maintain a full opening size. Please refer to sizing tables for full range of size options.

Door Curtain

77 mm rolled aluminium profile with 100 % CFC-free polyurethane rigid foam. Available in 16 standard colour, with a two-layer paint finish using a high-quality polyurethane paint coated with a polyimide. Each lath is 15 mm thick.

Frame and Construction

75 mm guide rails for single doors and 105 mm for double doors. Guide rails are supplied in a colour to match the door curtain and with an integrated brush strip either side. The box cover, rollers and barrel are pre-assembled for convenience. Please state on your order if fitting between or behind opening.

Operator and Control

GaraGlide operator and control included. 24 V DC gear drive, mains voltage 230 - 240 V AC, 0.5 KW, anti-lift kit, operator built into tubular drive with control board located on right as standard (viewed from inside) and impulse control. Operator with mechanically adjustable end-of-travel position. Included: 2 x bisecur 868 MHz hand transmitters and integral receiver, connecting lead with CEE plug, control buttons in cover of the control unit, integrated 2-minute garage courtesy light in control housing. The motor can be fitted either side. Also features an adjustable reversing procedure, adjustable pre-warning phase, adjustable automatic timer, connection of external illumination is possible and there is also a connecting option for a one-way photo cell.

Standard Colours

GaraGlide roller doors are available in a choice of 15 standard colours, with the door curtain interior and exterior painted the same colour:

- Traffic White (RAL 9016)
- Light Ivory (RAL 1015)
- Ruby Red (RAL 3003)
- Purple Red (RAL 3004)
- Steel Blue (RAL 5011)
- Moss Green (RAL 6005)
- Slate Grey (RAL 7015)
- Anthracite Grey (RAL 7016)
- Light Grey (RAL 7035)
- Agate Grey (RAL 7038)
- Terra Brown (RAL 8028)
- Cream (RAL 9001)
- Jet Black (RAL 9005)
- White Aluminium (RAL 9006)
- Grey Aluminium (RAL 9007)
- Chartwell Green

Anthracite Metallic (Noir 2100 Sable) is also available at an additional cost. See page 105 for additional colour options.

GaraGlide Roller Doors

Timber Effect Colours

A timber effect version is available in Golden Oak or Rosewood effect, where the exterior door curtain is coated in a UV-resistant synthetic foil with a timber effect design and embossed grain, and the interior of the door curtain is painted in Terra Brown (RAL 8028). A Deco Paint version is also available at a lower cost, where the laths are painted in a Golden Oak or Rosewood effect.

Fitting

The GaraGlide is suitable for fitting between and behind a prepared brickwork opening.

GaraGlide SBD

Only possible when installed completely behind opening. For clarification – no fascia or guides can show into the opening

- Only available in width range 1600mm – 2500mm
- Only available in heights range 2000mm – 3100mm
- Not available with electronic limits
- Not available with windows or ventilation grills
- Not available with emergency release

Packaging

GaraGlide roller doors are supplied in two twin-walled cardboard boxes for ease of transportation to site.

Stock Availability

All GaraGlide doors are made to order with no standard sizes. Lead-time for all doors is 4 weeks.

Size range

Secured by Design is an association focusing on the design of more secure homes and commercial properties. Secured by Design is owned by the ACPO (Association of Chief Police Officers) and awards the Secured by Design status to products that pass their extensive testing procedures.

Colour Options for GaraGlide Doors

Standard colours (choice of 15 colour options)	Included	
Anthracite Metallic (Noir 2100 Sable)	per m ²	43
Deco Paint (painted timber effect design in Golden Oak or Rosewood)	per m ²	43
Timber effect (plastic film coating in Golden Oak or Rosewood timber effect)	per m ²	77

Add £76 surcharge for external fit GaraGlide roller door.

Add £182 surcharge, to request the door curtain in one colour and the guide rails/box cover in an alternative colour. Please note there is no additional charge for a white frame.

Example of paint cost calculation:

For door dimensions of 2000 mm x 2125 mm, the door area is 4.25 m² (i.e. 2 x 2.125 = 4.25).

Multiply door area by cost per m² to calculate additional paint cost (i.e. 4.25 x 43 = £174.25).

Please note, dark colours should not be used for doors that are exposed to the sun. Despite the use of state-of-the-art colour coating systems, we cannot rule out colour deviations, specifically in metallic colours (RAL 9006 and RAL 9007).

Please state on your order if fitting between or behind opening.

External fit GaraGlide roller doors are only available up to 5000 mm wide and are not available in a timber effect finish.

GaraGlide is also available with a colour door curtain and white guide rails and box cover, at no extra charge. If required, please state clearly on your order.

GaraGlide Roller Doors

DuraBelt is available as an option when purchased with a new GaraGlide, or for retro-fitting to an existing GaraGlide:

DuraBelt (Optional)

1000 mm - 1600 mm wide (2 winding units)	surcharge per door	99
1601 mm - 3000 mm wide (3 winding units)	surcharge per door	146
3001 mm - 5000 mm wide (5 winding units)	surcharge per door	244

DuraBelt (Retro-Fitted)

up to 2300 mm wide (2 winding units)	Part ref: 8995301	per door	148
up to 2300 mm wide (3 winding units)	Part ref: 8995302	per door	223
from 2301 mm wide (2 winding units)	Part ref: 8995303	per door	148
from 2301 mm wide (3 winding units)	Part ref: 8995304	per door	223

Additional options

Preassembled Curtain *	43
Lifting Belts	43
Somfy Operator	309

* Only available up to 3000mm wide and 2300 high

User Information / Care

A Garador garage door needs only a minimum level of preparation and maintenance to give years of trouble-free service. Below is a guide to how to get the best from your garage door.

Operation

- For opening the door in manual operation use only the outside handle or inside handle. Never use the pull rope during the opening cycle of the door.
- For closing the door from the outside – the pull rope fixed to the internal handle is only designed to pull the door towards you whilst standing within the entrance of the garage until the door can be pushed down by hand, then using the external handle for final closing.
- For closing the door from the inside – the pull rope already mentioned is designed to be pulled away from you, when facing the front entrance of the garage, until the internal handle is able to be reached, by hand, and used for final closing. The pull rope is not designed to be used for any other part of the operating cycle, or any other purpose. Failure to comply with the above instructions may result in injury to persons or property.
- When the door is operated from either outside or inside, check the area through which the door will travel is clear from people and objects. Failure to do so may result in injury to persons or property.
- When closing, ensure the latches engage properly.
- If the door is power-operated always try to ensure you match the door with a GaraMatic electric operator.

Power Operated Garage Doors

- It is against the Law to install a power operated garage door in the UK without complying with The Machinery Directive.
- To comply with the Machinery Directive both the door and the operator used in the Installation must have a declaration of Incorporation from the manufacturer.
On completion of the installation the Installer must provide a Declaration of conformity and apply a CE mark giving details of the installation to the door/operator combination, which is now classed as a machine.
- The Installer must issue to the Customer a declaration of conformity on the completion of the installation.
- The Installer must hold copies of both the Declarations of Incorporation and the Declaration of Conformity on a technical file for inspection by the relevant authorities.
- If any of the above requirements are not fulfilled the Installation is illegal.
- Please ensure for your own safety and peace of mind that whoever installs your electric operator is both willing and able to fulfil these requirements; if they are not do not use them !!
- Members of the DHF CAN and WILL install your operator safely and legally.

Cleaning

- The door and frame if applicable, should be washed with a mild soap-based solution on a regular basis to prevent the build up of dirt, salts and other corrosive substances and help maintain the aesthetic appearance of the product.
- If the door is installed in a coastal location, the door panel and frame should be cleaned in this way at least every two months.
- We also suggest that all other components be brushed down on a regular basis to prevent the build up of dirt and dust etc.
- On GaraRoll roller doors regular removal of dirt and debris is required to avoid damage to laths when the curtain rolls.

Locking

- If the key is turned completely, the door is then locked or unlocked; when unlocked it is then possible to open and close the door by turning the handle.
- If the key is turned 1/4 of the way, the door opened and then the key returned to its start position, the door will re-lock when closed.
- By moving the internal locking "snib", it is possible to lock and unlock the door from the inside without using the key, except on SBD doors where there is no internal snib/locking system.

Maintenance

- If in doubt about any of these maintenance procedures below always consult a Garador specialist. Garador Ltd. has a nationwide network of installers who will be able to offer you a regular maintenance service on your garage door. Please call Garador or refer to the Garador website for further details of your nearest installer.
- Immediately after the door is fitted and after every 5,000 operations of the door, or at least once a year, oil all pivot points, check screws and clamped connections for tightness, keep the running tracks clean (do not grease them), check parts and replace any worn components where necessary.
- The springs should be replaced after approx. 25,000 operations by an experienced door fitter (see fitting and operation instructions).
- Do not oil the lock cylinder; if it is sticking, only lubricate with graphite dust.
- For canopy doors only, check the cable every 6 months with normal usage (8 operations per day). Have the cables replaced by an expert if any wear is found.

Finish – Steel Doors

The coating process applied to the door and chassis is environmentally friendly. Minor scratches or marks are not covered under the conditions of our warranty and should be repaired immediately to prevent corrosion and deterioration of the panel. Corrosive substances such as acids, alkalines, and salts, etc. should be cleaned from the door immediately; failure to do so will result in deterioration of the finish, which will not be covered under our warranty. Garador steel doors are finished products. They do not require immediate painting on-site. They are however not immune to damage, which can occur at any stage of the handling of the product from factory to site. Should deterioration of the finish start to occur you will need to repaint your door immediately. Prepare the surface lightly with wet and dry. Then treat with solvent based 2 pack epoxy wash primer and a normal commercial paint (cellulose paint must not be used).

Minor surface damage can easily be repaired using touch up sprays or paint sticks without invalidating your warranty.

Finish – Timber Doors

Timber panels are coated with a neutralising base-stain. Doors must be stored upright, under cover in a dry location, with wrapping intact, until wrapping is removed. As soon as the door is unwrapped, one coat of a good quality basecoat primer must be applied to both sides of the door. Immediately after installation, your timber doors require a further two coats of a good quality exterior wood finish on both sides. Initial application and periodic treatment should be carried out strictly in accordance with the woodstain manufacturer's instructions. Failure to follow these instructions will result in early deterioration of the timber panel which would not be covered under our warranty.

Finish – GRP Doors

GRP door panels should be periodically washed down using water. This should be done more frequently if fitted in a coastal location.

Bird droppings will bleach the finish on GRP and should be removed using water as soon as possible.

GRP doors should not be painted over.

Warranty

Garador products are manufactured to the highest quality standards and leave our factory only after rigorous quality testing. However, if you should have grounds for complaint, this section tells you what our door warranty offers, and how to go about making your claim.

In the unlikely event of a warranty claim becoming necessary, please contact the dealer or distributor who originally supplied your garage door. Your dealer should then supply details of the claim, together with a copy of the warranty card provided with the door and proof of purchase to the Warranty Department at Garador Ltd.

To enable your claim under warranty to be processed as quickly as possible, you should provide the following details:

- | | |
|--|---|
| 1 Your name, address and telephone number | 3 Product description/door type and product number |
| 2 Original invoice with date of purchase | 4 Description of defect |

An assessment of the claim will then be made. This may require Garador to inspect the product in-situ. In the event that there is no legitimate warranty claim under the terms specified herein, you may be liable for the costs of the inspection visit. We strongly recommend that you take note of the care and usage instructions displayed on the stickers on the back of your garage door and on the previous page and that you follow these instructions throughout.

Garador installers

Garador Ltd. has a nationwide network of recommended installers who will be able to offer you a regular maintenance service on your garage door.

Please call us on 01935 443722 or refer to the Garador website for further details of your nearest installer.

Warranty

Garador Garage Door Warranty

Warranty Period

The purchaser is granted a warranty covering the safe and reliable function of the Garador garage door for a period of 10 years from the date of purchase. A 5 year warranty applies to springs, wire cables, track rollers, hinges and guide rollers. The warranty period for replacement parts is 6 months or to the end of the current warranty period, whichever is longer.

In the case of foil-coated timber effect and PVC doors, a warranty of 5 years is granted, for timber and GRP doors a warranty of 2 years is granted on the door panels alone under the terms and conditions specified herein. The door mechanism and steel frame (if applicable) is covered by the 10 year warranty period.

Requirements

Warranty claims are only applicable in the country where the garage door was purchased. The product must have been purchased through our authorised distribution channels. The warranty only covers damage to the contract object. The fully completed warranty card together with the receipt of purchase correspondingly dated substantiates your right to claim under the warranty.

Performance

During the warranty period we undertake to rectify any and all defects to the Garador product which can be proved to be attributed to a material or manufacturing fault.

We pledge at our discretion either to exchange the defective merchandise for faultless merchandise, repair it or allow a reduction in price. We do not accept costs for dismantling and installation nor for carriage. Replaced parts become our property.

The warranty does not cover damage caused through:

- normal wear and tear
- negligent care and maintenance
- improper initial and subsequent operation
- negligent or wanton destruction
- external influences such as fire, water, salts, alkaline solutions, acids, abnormal environmental influences
- mechanical damage through improper transport and fitting
- priming and other surface protection treatments
- incorrect or too late applied surface protection treatments
- repair by non-qualified persons
- using non-Garador parts without the approval of the manufacturer
- Removal of the product number or making it unidentifiable

Warranty

Warranty GaraRoll and GaraGlide

GaraRoll and GaraGlide roller doors are subject to a limited 10 year warranty. The design of these doors represents state of the art technology. Pressure marks and abrasive wear, particularly on the top profiles are a condition of the design and cannot be avoided. They are not considered a reason for complaint. In order to avoid excessive friction, remove any dirt and debris from the door curtain at regular intervals. For motors and controls, see warranty below.

In addition to the statutory warranty provided by the dealer in the sales contract, we grant the following warranty for parts from the date of purchase:

- 5 years on operator technology, motor and motor control.
- 2 years on radio equipment, accessories and special systems.

Claims made under the warranty do not extend the warranty period. For replacement parts and repairs the warranty period is six months or at least the remainder of the warranty period.

General wear and tear:

Due to the design of the roller door, the inside of the door curtain will exhibit some marks after a short period of time. This is classed as general wear and tear that you would expect to see over a period of months or years. It is not detrimental to the door's performance and would therefore not be grounds for a warranty claim.

Pre-requisites:

The warranty claim only applies in the country where the equipment was purchased. The product must have been purchased through our authorised distribution channels. A claim under this warranty exists only for damage to the object of the contract itself. The receipt of purchase substantiates your right to claim under the warranty.

Services:

For the duration of the warranty we shall eliminate any product defects that are proven to be attributable to a material or manufacturing fault. We pledge to replace free of charge and at our discretion the defective goods with non-defective goods, to carry out repairs, or to grant a price reduction. Replaced parts become our property. Reimbursement of expenditure for dismantling and fitting, testing of parts as well as demands for lost profits and compensation for damages are excluded from the warranty.

Warranty

Damage caused by the following is also excluded:

- improper fitting and connection
- improper initial start-up and operation
- external factors such as fire, water, abnormal environmental conditions
- mechanical damage caused by accidents, falls, impacts
- negligent or intentional destruction
- normal wear or deficient maintenance
- repairs conducted by unqualified persons
- use of non-original parts
- removal or defacing of the data label

Electric Operator Warranty

A separate 5 year warranty is granted on our electric operators. This includes operator mechanics, motor and motor control systems. A 2 year warranty is granted on radio equipment, accessories and system controls. There is no warranty on consumables (e. g. fuses, batteries, bulbs etc.).

For further details please contact us on 01935 443722, or through our website on www.garador.co.uk

Extracts from DHF consumer advice

The following document has been created by the Door and Hardware Federation (DHF) and endorsed by all major UK garage door manufacturers, as a guide for purchasers and domestic garage doors.

Visual Appearance of Garage Doors

A new garage door can be a significant investment that will transform the appearance of your home. This information is a guide to the quality you can expect.

The Quality Check

The quality check should be carried out in natural daylight, not direct sunlight. Stand at a distance of 3 metres from the door to view the overall appearance. The door is acceptable if, taking into account the facts below, none of the following are readily visible on the face of the door:

- Marks or distortion associated with the manufacturing process
- Minor indentations, marks or scuffs on the surface
- Paint or stain blemishes

The Facts

Steel Doors

- Panel Distortion

The rolling or pressing of steel panels during manufacture will cause distortion in the steel and while every effort is made to keep this to a minimum, inevitably some visible distortion will remain. The application of high gloss paints will make this slight distortion more apparent, especially under certain lighting conditions, such as car headlamps, or bright sunshine.

- Paint Finish

Primed doors – the primer coating is applied as a base coat only and as such requires additional finishing with a good quality exterior paint. Any marks or scratches on the primer coat should be rubbed down and repainted as part of this finishing process.

Finished doors – the factory application of the paint finish is an automated process and this may result in minor blemishes or slight inconsistencies in the paint, particularly in the area of panel joints.

Timber Doors

- Timber

Timber is a natural product and there will be variations in pattern, colour, shading and grains. No two doors will be the same. Wood naturally expands and contracts according to environmental conditions, joints will open and close and some minor curvature may occur.

- Finishing

It is vital that timber doors are fully finished as per the manufacturers instructions before exposure to the elements.

Extracts from DHF consumer advice

GRP and composite Plastic Doors

- Mould Marks

GRP doors are individually handcrafted in a mould and are then hand finished. Some minor marks and blemishes will inevitably remain after this process.

- Translucency

When viewed from the inside, it is often possible to see variations in the translucency of the door, particularly around and between areas of relief. Such variations do not detract from the overall strength or build quality of the door.

All Doors

- Colour Match

Pairs of doors should be ordered together to obtain the best colour match, bearing in mind the limitations of the materials used in the construction. Timber garage doors cannot be ordered as matching sets.

- Size Variations

As the size of a door changes in height and/or width, the panel frequency and profile can change, therefore doors of the same style but of different sizes can be significantly different in appearance.

- Clearances

All doors require operating clearances, i.e. the gap between the door panel and the frame opening, these are inbuilt during manufacture and should not be reduced by means of infills, or draughtproofing.

- Deflection

When in the open position, all doors will display a level of vertical deflection or 'sag' across the width of the panel. Individual manufacturers' specifications should be consulted for exact tolerances.

GARADOR

The Garage Door People

Bunford Lane, Yeovil, Somerset, BA20 2GL

Tel: (01935) 443722
